

MitreBond and MitrePen **Rapid adhesive system**

New and Improved!

Bond faster:

Our updated formula provides the same great bond, now in **only 10 seconds!**

Bond safer:

Hazardous ingredient DMPT has now been REMOVED from the MitreBond family of products, removing the potential for associated long-term health effects.

Key features:

- MitreBond is the original and strongest quick setting adhesive on the market. No nails, no clamping, no waiting – no mess!
- MitreBond has many uses and can be used to fix bowed upstands in place, UPVC window trims, door trims, melamine end strips, skirting and architrave joints, architectural moldings, cornice and pelmet and many more.
- MitrePen is the MitreBond activator. It is quick and clean and as it is a precision marker rather than a spray, it prevents the staining caused by overspray.
- MitrePen is not affected by sunlight so there is no yellowing.

- MitrePen covers the same area as 3 x 200ml activator sprays. It will set MitreBond adhesive in 10 seconds.
- It is environmentally friendly and can be easily transported by post.

Directions for use:

MitreBond is an instant bonding low viscosity adhesive to give greater bond strength on porous surfaces. Apply one or two drops of adhesive onto one side of the joint and then apply MitrePen activator to the other side of the joint. Quickly bring the two sides into line and firmly press together, hold for 10 seconds and it's complete.

Consumer benefits:

MitrePen is a precision marker so there will be no danger of ruining

cornice etc. with overspray.

MitrePen is small and neat to carry around and can be used on any superglue to speed up fixing time.

Materials MitreBond can be applied to:

MDF
Timber
Glass
Ceramics
Aluminium
Chipboard
Perspex
Steel
Porcelain
Some plastics
Retailer Opportunity:

MitrePen is a new product innovation. It is less bulky than the aerosol for fitters to carry around and has numerous applications.
